

AEGIS COMPLIANCE AI

London, United Kingdom

8 April 2025

Initial Seed Capital for Aegis Compliance AI

What is Aegis?

Aegis is a compliance intelligence solution for tech and AI companies expanding into regulated markets like the UK and EU. We help businesses stay ahead of evolving legal frameworks (like GDPR and the EU AI Act) without slowing down innovation. We transform compliance from a blocker into a scalable, strategic asset.

The Problem

Compliance laws are rapidly changing and fragmented across countries. Tech companies struggle to:

- Understand requirements
- Implement ongoing processes
- Expand confidently into new markets

Most solutions focus on static audits or certifications, not on dynamic, forward-looking adaptation.

The Solution

Aegis provides a lean, modular compliance platform that helps companies:

- Identify risk across product features and data usage
- Track alignment with legal frameworks in real time
- Adapt policies, practices, and documentation effortlessly

We make compliance a living system, not a one-off box-tick.

Our Model

- B2B SaaS subscription (tiered based on features that will be rolled out in 3 stages: risk assessment, compliance tracking, AI bias detection)
- One-time audits + consultancy available
- Future add-ons: integrations, region-specific modules, and team compliance automation

Traction & Momentum

- Website, branding, and early MVP in place
- Strategic conversations with accelerators and compliance hubs underway
- Investor interest already confirmed
- Raising £50k–£70k
- SEIS Advance Assurance preparation in progress for UK tax residents

**Use of Funds**

- Finalising MVP and first customer pilots
- Marketing and outreach to early-stage tech firms
- Lean founder salary to support full-time execution
- Involvement in a leading acceleration program to secure a clean, strategic go-to-market execution
- Securing committed investor capital to fuel early traction and long-term runway
- Legal, operational, and hosting infrastructure

Why Now?

Regulations are tightening. AI is exploding.

Companies don't just need lawyers, they need guides, scalable ones.

Aegis aims to position itself as the layer that enables confident, compliant innovation.
